

NEBOSH Award in Environmental Awareness at Work

The **NEBOSH Award in Environmental Awareness at Work** provides an introduction to environmental issues within the workplace. It is aimed at staff who require a basic understanding of environmental issues such as in organisations that are:

- looking to introduce an Environmental Management System
- seeking to improve their environmental performance

Course Content

The NEBOSH Award is made up of one unit:

Foundations of environmental awareness

- The meaning of environment, habitats, ecosystems, pollution and sustainability
- The importance and benefits of sustainable development
- Environmental management systems (EMS)

Pollution, impact assessment and emergencies

- Principles and practice of impact (risk) assessments
- The main sources, types, control and impacts of air pollution
- The main sources, controls and impacts of water pollution
- The main sources, controls and impacts of environmental noise
- Types of waste - hazardous, non-hazardous, and other legally controlled categories
- Waste management
- Dealing with environmental emergencies

Assessment

The **NEBOSH Award in Environmental Awareness at Work** is assessed by a 30 minute multiple choice exam, which takes place on the day of the course.
